

Polycom® V-Series Systems

V-Series Signature Benefits

V-Series Signature Benefits mean that your V-series product meets the high quality conferencing standards of Polycom's award winning VSX™ line of products

People+Content™ IP – Allows voice and video participants to share content during a video call – cable free

StereoSurround™ – Separates multiple voices with conversational stereo – as natural as being in the same room

Siren™14 – Eliminates listening fatigue with the clearest audio in the market

SIP Support – Enables SIP benefits from desktop to boardroom – all video solutions include SIP support

AES Encryption – Keeps every conference secure through standards-based encryption

iPriority™ – Provides the industry's most comprehensive set of QoS features for IP networks

VSX User Interface – Simplifies ease of use – common among all VSX and V-series systems and is customisable

Polycom offers ideal video conferencing solutions for every organisation and business executive at every level

Without a doubt, the information age has created an always-connected, on-demand world. In fact, the majority of business isn't conducted in person; it's done via the keyboard or conference calls.

But in today's digital economy, the ability to spend face time with key business associates, especially for smaller to medium-sized businesses, may be the real trump card to gaining and sustaining a competitive advantage.

That's why today, more than ever, you'll find executives, remote workers, business partners and suppliers relying on Polycom video products for communication and collaboration. Instead of flying time-stretched executives all over the globe, corporations can utilise intellectual assets more productively and save millions in travel expenses simply by setting up an office video conferencing system.

Imagine the top-line results of making conferencing and collaboration available to your road warriors, field sales forces, customer service representatives, operations specialists, business development managers, and all the others who practically live on the road or work in a location other than headquarters. Then consider the bottom-line benefits to your business – higher productivity, improved efficiency, faster time to market and greater customer loyalty.

Polycom brings unprecedented price and performance to voice and video conferencing and collaboration, making it an affordable productivity tool for more employees and organisations. No wonder so many people around the world already use Polycom video solutions to enhance collaboration, respond more quickly to customer demand, solve support issues, react to market opportunities, and battle competitive threats, all while reducing costs.

Isn't it time your organisation joined the video conferencing and collaboration revolution?

Make Great Things Happen with Polycom V-Series Systems

In today's Internet driven world, the ability to conduct real time communication and collaboration has become critical to an organisation's survival. As the market leader in voice, video, data and Web solutions, our award-winning conference technology makes it easy for people to interact and maximise productivity – over any network, in just about any environment, anywhere around the globe. That's why more organisations worldwide use and prefer Polycom conferencing solutions. Because when people work together, great things happen. See how you, too, can achieve great things with Polycom V-Series systems.

V700™: Executive desktop video conferencing with essential functionality for remote offices and managers at any level

Connect with employees, co-workers, vendors and suppliers from the comfort of your office with business quality video and crystal-clear audio. Attractive, functional and affordable, the V700 executive desktop solution enables you to communicate in person with others around the globe without ever leaving your office.

- Easy out-of-box setup ensures you are up and running immediately
- Privacy options ensure your confidential business conversations stay confidential
- 17" LCD display doubles as a PC monitor, saving valuable desk space and allowing you to use your V700 even when not in a call
- Simple remote control answers incoming video calls or initiates outgoing calls
- Enjoy the same user-friendly graphical interface found on all Polycom VSX and V-series products
- Bring multimedia to your video call by sharing presentations, documents or images with the remote site(s)

Options:

- People+Content IP – Share PC content cable free with the conference participants – no need to connect your PC to the VSX

V500™: Simple and affordable video calling for small businesses, remote offices and telecommuters.

For the first time, simple and affordable video calling comes with unparalleled audio and video quality. As easy to use as your television, the Polycom V500 brings the benefit of video conferencing to everyone. Together with its superior audio and video performance, the Polycom V500 is affordable and supports industry standards so you can call anyone, anywhere.

- Easy-to-use setup wizards allow step-by-step guides for a quick installation
- Simple remote control answers incoming video calls or initiates outgoing calls
- Intuitive graphical user interface can be customised for any level of user. Main dialling screen can be configured with present dialling locations, for one-button calling
- Capable of seeing both near and remote video on screen, simultaneously with Polycom Dual Monitor Emulation

Options:

- People+Content IP – Share PC content cable free with the conference participants – no need to connect your PC to the VSX
- ISDN – purchase either an IP only or IP/ISDN system
