

neat.bar pro

Go up a notch.

Neat Bar Pro packs a stack of tech into a simple and elegant device. Capable of driving three large screens, it allows you to enjoy an incredibly immersive higher-quality people and content experience throughout any room during your Zoom meetings. Neat Bar Pro is especially ideal for large meeting spaces as it incorporates two extreme resolution cameras and an advanced image depth sensor that combined deliver 16x zoom. So you're able to see everyone in full close-up, no matter where they sit in the room.

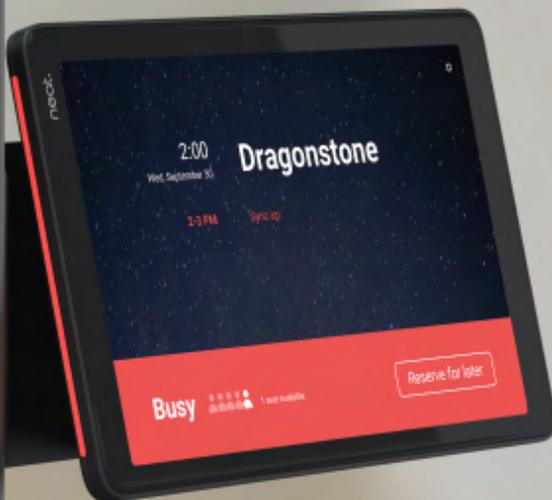

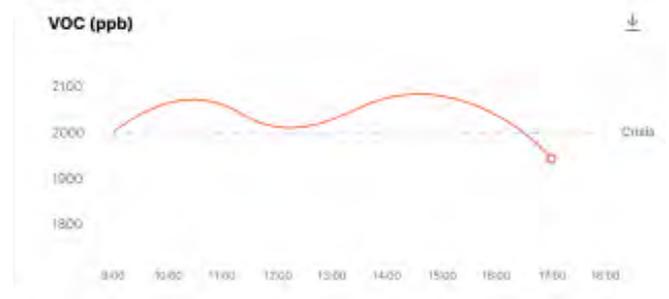

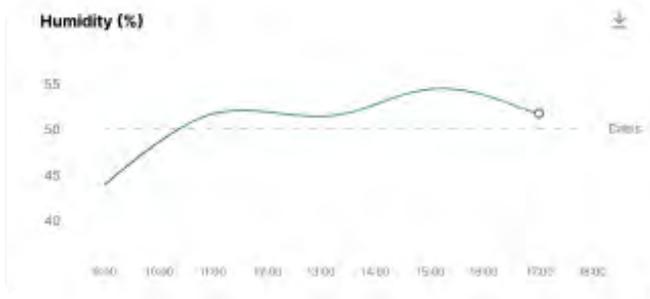

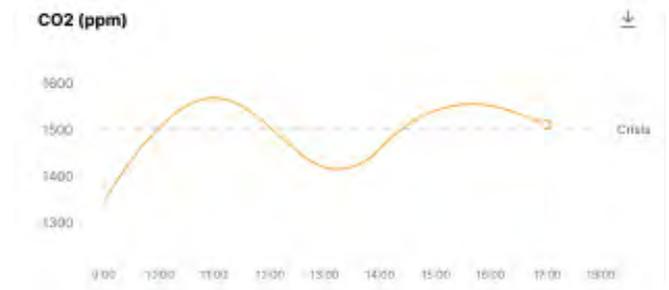

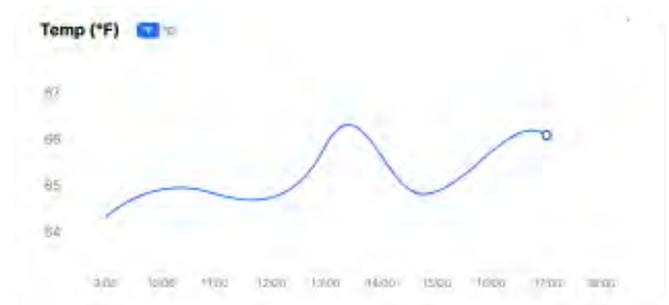

Neat Symmetry.

We call this pioneering feature Neat Symmetry as it brilliantly restores symmetry between the people in the room and those who are remote by creating a more human connection of felt individual presence. Whereas before this was a broken link in video conferencing, now with Neat Bar Pro, you can focus in on everyone to read every facial expression or gesture, so all interaction is captured. What's more, Neat Bar Pro has an advanced microphone array for clearer audio pick-up in large rooms, and three full-range speakers that produce superb stereophonic sound. Plus, Neat Audio Processing means no garbled 'double talk' issues or problems with background noise.

Safer meeting rooms.

Thanks to Neat Sense, Neat Bar Pro enables companies to offer significant health benefits to their employees, which in today's new normal of having to take ever-increasing protective measures against COVID-19 can be a huge relief. Neat Sense helps you control and monitor air quality, humidity (healthy indoor humidity levels are between 30-50%), CO2 and organic chemical levels in the room – scents, odors, etc. Also, whether or not there are people in a room and if so, how many. That way, you can be sure of maintaining safe social distancing at all times. And because Neat Bar Pro automatically frames people, it doesn't matter how few are in a room and how far apart they are, you'll still get to see and hear them perfectly well.

Extensible.

Neat Bar Pro is audio extensible too, giving you the option of connecting it to any of your existing ceiling mics and speaker systems. And if you wish, you can deploy extra Neat Pad controllers throughout large rooms, empowering additional people to start a meeting, tap mute and more. Or Neat Pad schedulers to cover all entrances.

All management of Neat Bar Pro will be via the Zoom Portal, with all software updates securely applied through Zoom. Neat Bar Pro will be available for pre-order late spring 2021.

Managed and supported by Zoom.

Neat removes complexities and threats thanks to our secure, single-purpose hardware devices. That means less stressing about passwords and patches. Plus, Zoom is your single point of contact for support.
