

SPECIFICATION

Range: **MITESCO**
Design: **Michele De Lucchi**

“Snowsound Technology” sound-absorbing element fixed to the ceiling.

Panel description:

Both faces with convex section 36 mm thick, consisting of an internal padding in variable density polyester fiber. The density decreases moving towards the heart of the panel, which is covered on both sides with Trevira CS® polyester fabric, solidly applied to the padding. The panel is double sided, with same characteristics on both sides. It is characterized by the rigid edge obtained by the manufacturing process itself, without any supporting and/or stiffening frame. The panel is equipped with two series of punched holes for anchoring to the appropriate supports.

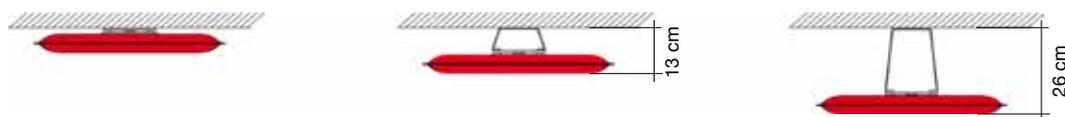

The panel has an **Italian Class1** fire reaction and **Euroclass B-s2, d0**.

The panel is **Greenguard Gold** certified, which validates its low VOC emission and its contribution to the quality of the indoor environment.

The panel is **100% recyclable** and has no detectable formaldehyde content according to UNI EN 717-2. It does not contain felts or other organic materials that are hardly recyclable.

The panel has been tested in reverberation chamber according to UNI EN ISO 354 and obtained “**Acoustic Absorption Class A**”, in accordance with UNI EN ISO 11654.

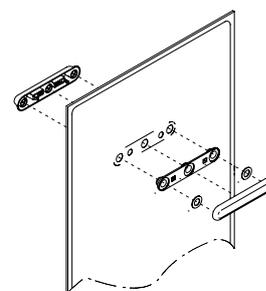

Panel dimensions:
75x44 cm
119x44 cm
159x44 cm

Fixing description:

Two pairs of metal supports are fixed through panel holes. Visible on both sides, covered on the front by a painted metal casing (same colour of the panel). A stiffening bar, made of epoxy powder coated steel, is fixed both to the rear supports and directly to the panel through screws. The panel can be fixed to the ceiling using epoxy powder coated spacers (3mm thick) or directly by means of special screws.

The products described in this data sheet are **CE marked** according to the harmonized product standard EN 13964 for the intended use as a drop ceiling..
